-----------------	---

Java (First real love, was teaching at University)

Python (No need to read tutorials, feeling comfy to code anytime)

C (First ever learned, in love with Makefiles and its performance)

C++ (Second to learn after C, but as soon I learned Java forgot about it)

MongoDB (Queries, Aggregations, and Optimizations)

### **DevOps**

Continuous Integration and Deployment (Big fan of CI/CD Travis, GitLab, and Actions)

Code Quality (Coveralls, maven-plugins, Style-Checkers, and Reports)

Hosting (Firbase, Docker, Google App Engine, and lover of Cloud Functions)

Mobile CI/CD (Bitrise supporter for Cordova and slightly Flutter user)

Configuration Management (Ansible because it uses YAML)

### **Projects**
